

peek-eebee

Babies love looking through holes and peeking and seeing the world up close. Fold this sheet of paper in half to easily cut out the printed circle. Hold the paper between your face and your baby's face. Look through the hole. Move the paper around so that you can frame different parts of your face. Stick your nose through the hole... "I smell you with my nose...." Center the hole on your mouth. Talk with your baby. Throw a kiss.

Stick out your tongue. Have fun. Move the paper around your baby's face, too. Touch and point out his/her features. As another option, place this "window" over a picture in a book or magazine. Move it around and look at and comment on what appears in the hole.
